Good Morning Healthcare Clients:

Ransomware assaults are all tricks and no treats. They are quite real and becoming more commonplace, with the medical field being a major target.

Yesterday, *The Detroit News* published an article you won't want to miss:

[FBI warns ransomware assault threatens U.S. health care system](#)

The article reveals the latest threats that occurred this week, contains more info about the ransomware called Ryuk, and details what happens to an organization that experiences a cyber attack. It's definitely worth a few minutes of your time.

Additionally, you'll find our latest eBook, **[Why Healthcare Entities Need Cyber Liability Coverage](#)** below. As Mason-McBride's resident cyber expert, I'm here to help our clients manage their cyber risks.

If you have any questions or you're ready for a complimentary cyber liability review, please reach out to your Producer or contact me at: **jrperry@mason-mcbride.com**.

Thank you for being a Mason-McBride client and have a Happy Halloween!

Sincerely yours,

Jamie Parry
Senior Vice President
